

# Artwork Controller Wiring Diagram

## Wires:

Green: these connections can be any size you have that can fit into the arduino header. 28 GA is a good start

Red: 20 GA for power

Black: 20GA for GND

## Motor Controllers:

All switches on the motor driver should be flipped to ON

## Stepper Motors:

The motors were advertised to come with an Xtension connector to connect the custom length wires to the motor connector.
